CARLOS MATHEU

WEB DEVELOPER

Introduction

For over 14 years I feel a growing interest in web development and I 'm into it professionally since 10 years ago. I am avid self-taught searching for new solutions to the always same old problems and open to new challenges with self-discipline and ability to work with minimal supervision. Looking for attractive and ambitious projects in an environment of dynamic and positive work , where I could grow and bring my enthusiasm and knowledge.

Especially interested in projects with a social and collaborative value that bring new technologies to the people and the communities for cooperative and social ends.
